May 21, 1979

State of Utah  
Division of Oil, Gas, and Mining  
1588 West North Temple  
Salt Lake City, Utah 84116

Attention: Mr. K. Michael Thompson  
Engineering Geologist

Dear Mr. Thompson,

Our initial assessment of your proposed species list and applications rates as stated in your Sept. 14, 1978 memo appears acceptable for the revegetation of the MiVida project. In general, the species you suggested seem ammeanable to the soils conditions we anticipate in reclamation following mining.

However, in reviewing your proposal and in discussions with mining associates, it is our understanding that the availability of seed for certain plant species may become very scarce to none <sup>ent</sup> existence during certain periods. We will try to follow the plan as close <sup>ent</sup> as possible.

We express our apologies for the delay in acting on this matter and should any future questions arise, please contatce <sup>ent</sup> us.

Sincerely yours,

Stephen M. Nielson  
Vice President, Minerals West Inc.
